

Village Enterprise and Makerere University

cordially invite you to:

5 Acres or Less

A Workshop on Agricultural Planning for Small-Scale Farmers in East Africa

Fairway Hotel, Kampala, Uganda

February 10th - 11th 2014

Five Acres or Less will utilize an innovative, hybrid platform to ensure maximal benefit accrues not just to the small scale farmers who we hope to better serve following this event, but also to those organizations that participate with us in this endeavor. The format of the workshop will blend formal presentation of cutting-edge research conducted by thought-leaders on subjects such as agricultural productivity, mAgriculture (mobile Agriculture IT tools), micro-level best practice farming techniques, and poverty alleviation with smaller, more focused break-out sessions where attendees can workshop solutions to a variety of adversities faced by micro-farmers from the Village Enterprise program who will also be in attendance.

All travel and conference costs will be covered.

Together we can turn small acre farms into hope for the future.

Together we can transform lives.
